### DETAILED ACTION

1. The preliminary amendment filed April 13, 2001 has been received and entered.

### *Information Disclosure Statement*

2. Applicant's prior art citation filed April 3, 2000 has been received, considered and placed of record.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16, 19, 23, and 25 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,163,771. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of claims 1-21 of the U.S. Patent No. 6,163,771 essentially teaches all the features of the current application. The patent does not explicitly mentioned a communication unit in communication with the processing unit operable to transmit and receive information; however, it discloses a

communication port (1206) in communication with the central processor. It would have been obvious to one having ordinary skill in the art to acknowledge that there is a communication with the processing unit for transmitting and receiving information. Furthermore, U.S. Patent No. 6,163,771 teaches at least one or more financial account identifiers (column 4, lines 53-62); therefore, it would have been obvious to one having ordinary skill in the art to use more than one financial account identifiers to facilitate one's financial account transactions.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
